

Work Station Mat For Extreme Standing Conditions.

Relief for aching joints. Eliminates vibrations both natural and man-made that are transmitted and amplified by concrete and steel floors.

Allows stationary motion that keeps your joints lubricated and your circulatory system functioning.

Strengthens ankle and leg muscles.

Non-conductive and self-extinguishing.

Floor hugging and resists slipping on most surfaces. Receptive to most adhesives.

Closed cell foam rubber will not absorb liquids and the cut cells along the edge are receptive to all types of washing or sanitizing.

Caution Bar Guaranteed not to compression set.
striped for safety.

Summary

Ergokneel, being one inch high, is distinctly different from the stress relief mats currently available today, which are designed for foot traffic. Clearly the only option for those who stand on stress relief mats has been to stack two or more mats creating a trip hazard in the work place.

Today's knowledge of Ergonomics and soft tissue damage has made it more than clear that a better solution was needed for people who must stand.

Promotes gentle
muscular activity
that keeps body
fluids moving.

Keeps muscles
conditioned
rather than
stressed.

STOPS the pain associated with static standing.
